Dr. Rachel P. Dultz is a Fellowship trained Breast Surgical Oncologist and a board certified surgeon. She has been treating (operating on and caring for) women with breast cancer for over 11 years in the Princeton and surrounding areas. In January 2009 she proudly opened her own private practice to focus on patients with diseases of the breast exclusively. Her objective is to provide patients diagnosed with breast cancer the best quality of care and latest surgical options.

Dr. Dultz and her staff put their patients first. They firmly believe their patients should be educated about the best options for their breast cancer treatment and be involved in decisions regarding their care. She recognizes that everyone is different so her goal is to understand and serve each individual patient's needs one by one, and then develop a personalized plan for their breast cancer treatment-usually starting with surgery.

What makes Dr. Dultz so unique is the personal care she gives to her patients, from the initial consultation, to the surgery performed and finally to the post operative care she delivers. And the support does not stop once a patient has completed treatment. She provides emotional support and works closely with her patients to help them maintain their health and take the next steps in their recovery.

Dr. Dultz banks with The Bank of Princeton because its goals and ideals are very similar to hers: personalized care and attention to detail with the utmost quality. The Bank of Princeton is a professional place that offers excellent banking services with an intelligent and friendly staff. They helped her to get her business started almost one year ago and their online services keep her on her toes today.
