Lewis Barber Construction (LBC) commenced operation in 1987. Our geographic area of service is Princeton and the towns immediately adjacent to Princeton. Our core business is residential construction. LBC has build over sixty custom homes and thousands of additions and renovations over the last twenty five years. Lewis Barber Construction also does light commercial work such as the renovation (s) of Blue Point Grill, office space in Henderson realty building and other office renovations.

I was introduced to The Bank of Princeton after building a new home for one of the founders of The Bank. I also built a new home for one the major investors in The Bank of Princeton. Why The Bank of Princeton? They offer great personal service, they are responsive to our needs, and have low fees unlike the national banks in town.
